Re: BMP San Antonio License Company, LP
KZDC (AM), San Antonio, Texas
Facility Identification Number: 65330
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed March 21, 2011, on behalf of BMP San Antonio License Company, LP ("BMP"). BMP requests further extension of the special temporary authority ("STA") granted on April 9, 2010, to operate Station KZDC pursuant to Section 73.1615.¹ In support of the request, BMP states that has completed construction of modified daytime facilities and has filed an application for license; however, its application to relocate its nighttime facilities to the site of commonly owned Station KTSA remains pending. BMP requests STA for continued operation during nighttime hours from its daytime site with a temporary nondirectional antenna and reduced power.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KZDC is licensed for operation on 1250 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U). Construction Permit BMP-20100803AAK authorizes relocation of the daytime transmitter and an increase in operating power to 25 kilowatts, employing a directional antenna; Construction Permit BP-20071025AAJ authorizes relocation of the nighttime transmitter and an increase in operating power to 2 kilowatts, employing a directional antenna (DA-2-U).

Our review indicates that License BMML-20100908ADM, for modified daytime facilities, was granted on December 13, 2010; thus, the licensee has made substantial progress toward restoring licensed operation and extension of STA is warranted. Based on the information provided, the STA is modified appropriately.

Accordingly, the request for extension of STA IS HEREBY GRANTED, with modification as discussed above. Station KZDC may continue to operate during nighttime hours from the licensed daytime site with a nondirectional antenna and reduced power not to exceed 0.25 kilowatt. It will be necessary to further reduce power or cease operation if complaints of interference are received. BMP must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 13, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a stylized, flowing script.
